This listing of the claims will replace all prior versions and listings of claims in the application:

Listing of the claims:

Claim 1 (currently amended): A pressure-sensitive adhesive composition which comprises three ingredients,—

i.e., of polyisoprene, a styrene/isoprene/styrene copolymer, and solid polyisobutylene, in a proportion of (10-60)/(10-50)/(20-60) parts by weight relative to the total weight of the three ingredients and further contains a non-solid isobutylene polymer and a tackifier, characterized in that the amount of the non-solid isobutylene polymer is 1 to 30 pts.wt. parts by weight, excluding 30 pts.wt. parts by weight, per 100 pts.wt. parts by weight of the sum of the three ingredients, i.e., of polyisoprene, a styrene/isoprene/styrene copolymer, and solid polyisobutylene.

Claim 2 (original): The pressure-sensitive adhesive composition according to claim 1, wherein the viscosity average molecular weight of the solid polyisobutylene is not less than 900,000.

Attorney Docket No.: KUZ0029US.NP
Inventors: Shirai et al.
Serial No.: 10/575,562
Filing Date: April 12, 2006

polyisobutylene is not more than 70,000.

Page 3

Claim 3 (previously presented): The pressure-sensitive adhesive composition according to claim 1, wherein the viscosity average molecular weight of the non-solid

Claim 4 (currently amended): The pressure-sensitive adhesive composition according to claim 1, wherein the blend amount content of the tackifier is in a proportion of 10-80 pts.wt. parts by weight relative to the total weight of the three ingredients of polyisoprene, a styrene/isoprene/styrene polymer and solid polyisobutylene.

Claim 5 (previously presented): The pressure-sensitive adhesive composition according to claim 1, wherein the tackifier is one or more kinds selected from a group consisting of a rosin type resin, a terpene type resin, a petroleum type resin, a phenol type resin, a xylene type resin, an alkylphenol type resin and a coumarone-indene type resin.

Claim 6 (previously presented): The pressure-sensitive adhesive composition according to claim 1, wherein it further contains a drug.

Claim 7 (previously presented): The pressure-sensitive adhesive composition according to claim 1, wherein the pressure-sensitive adhesive composition is laminated on a backing and covered with a liner.
